

LearnyMo – Complete MVP Development Specification

Product Name: LearnyMo

Tagline: Your Topic. Your Time. Your Teacher.

This document defines the **complete LearnyMo MVP** to be developed as the first production-ready web platform.

1. Product Purpose

LearnyMo is an online learning platform connecting students with teachers based on the student's exact learning requirement.

A student should be able to learn:

- A specific **Topic**
- A complete **Unit**
- A **Full Subject / Full Syllabus**

The platform supports:

- 1-to-1 classes
- Group classes
- Paper classes
- Unit classes
- Topic classes
- Full-subject classes
- Class series

The core platform flow is:

Student Need → Request/Demand → Teacher → Class → Booking → Payment → Chat → Online Class → Feedback

2. User Roles

The MVP has three user roles:

Student

Students can:

- Register/login
- Manage academic information
- Search and book classes
- Request 1-to-1 classes
- Join group classes
- Request group classes
- Chat with teachers after booking acceptance
- Join online classes
- Track syllabus progress
- Use study planner
- Manage payments/wallet
- Give teacher feedback

Teacher

Teachers can:

- Register/login
- Submit verification documents
- Create/manage teaching profiles
- Select subjects, units and topics they teach
- Set fees
- Set availability
- Create classes and posters
- View student requests
- View student demand
- Manage bookings
- Chat with students after booking acceptance
- Conduct online classes
- Manage schedule
- Manage wallet/earnings

Admin

Admin can:

- Manage students
- Manage teachers
- Verify teachers
- Manage academic structure
- Manage classes
- Manage demand

- Manage payments
 - Manage content
 - Manage platform settings
-

3. Public Website

Users should be able to access the following without logging in.

Home Page

Hero section:

Your Topic. Your Time. Your Teacher.

Supporting text:

Learn exactly what you need, with the right teacher, at a time that works for you.

Main buttons:

- **Book a Class**
- **Find a Class**
- **Become a Teacher**
- **Login**

Other Public Pages

- About LearnyMo
 - How It Works
 - For Students
 - For Teachers
 - Contact Us
 - FAQ
 - Terms & Conditions
 - Privacy Policy
-

4. Student Registration

Fields:

- Full Name
- WhatsApp Number
- Mobile Number
- Email
- Location
- Grade
- A/L Stream, if applicable
- Medium
- Password

After registration, the system generates a unique Student ID.

Example:

LMO-00005

Student login:

Student ID + Password

5. Student Navigation

Dashboard

Class Booking

- 1-to-1 Classes
- Group Classes
- Paper Classes
- Unit Classes
- Topic Classes
- Full Subject Classes
- Class Series

My Requests

My Classes

Timetable

Chat

My Syllabus & Progress

Study Planner

Past Papers & Notes

Wallet

Profile

Notifications

Settings

6. Student Dashboard

The dashboard should provide quick access to the most important functions.

Summary Cards

- Today's Classes
- Upcoming Classes
- Pending Requests
- Not Clear Topics
- Wallet Balance

Example:

Today's Classes – 2
View Timetable →

Quick Actions

- Book a 1-to-1 Class
- Browse Group Classes
- Request a Group Class
- View My Syllabus
- Open Study Planner

Personalized Classes

Display:

Classes for Your Not Clear Topics

If a student marks a topic as **Not Clear**, and a teacher later creates a class for the exact topic, that class should automatically be recommended to the student.

7. Class Booking

Class Booking is one of the core MVP modules.

Students can find or request classes.

Class Booking contains:

1-to-1 Classes
Group Classes
Paper Classes
Unit Classes
Topic Classes
Full Subject Classes
Class Series

8. 1-to-1 Class Booking

Student selects:

Academic Information

- Grade
- Stream, if applicable
- Subject
- Medium

Learning Requirement

- Specific Topic
- Unit
- Full Subject / Full Syllabus

If Topic/Unit is selected, the relevant academic hierarchy should be displayed.

Preferred Date

Student selects preferred date.

Preferred Time

Student selects a **time range**, not only one exact time.

Examples:

- Morning: 8 AM – 12 PM
- Afternoon: 1 PM – 4 PM
- Evening: 5 PM – 8 PM
- Night: 8 PM – 10 PM
- Custom time range

Duration

- 1 Hour
- 2 Hours
- Custom

Payment Preference

- Per Hour
- Per Class
- Monthly

Budget

Optional.

Then:

Submit Booking Request

9. 1-to-1 Booking Flow

```
Student
↓
Select Grade
↓
Select Subject
↓
Select Topic / Unit / Full Subject
↓
Select Medium
↓
Select Preferred Date
↓
Select Preferred Time Range
↓
```

Select Duration
↓
Submit Request
↓
Teacher Matching
↓
Teacher Provides Fee & Availability
↓
Student Accepts
↓
Payment
↓
Booking Confirmed
↓
Chat Enabled
↓
Online Class
↓
Class Completed
↓
Rating & Feedback

10. Booking Status

The system should support:

Pending
Teacher Found
Teacher Accepted
Student Accepted
Payment Pending
Confirmed
Completed
Rejected
Cancelled

Important

Only **Confirmed** bookings should appear in the student's and teacher's confirmed timetable.

11. Group Classes

Teachers create group classes and students browse/enroll.

Students can filter by:

- Grade

- Stream
- Subject
- Medium
- Unit
- Topic
- Date
- Fee
- Teacher

Class card should display:

- Poster
- Class title
- Teacher
- Grade
- Subject
- Medium
- Topic/Unit
- Date
- Time
- Duration
- Fee
- Maximum students
- Current enrollment
- Available seats

Buttons:

View Details

Enroll

Pay

12. Paper Classes

Separate class category.

Teachers can create:

- O/L Past Paper Classes
- A/L Past Paper Classes
- Model Paper Classes

- Past Paper Discussion Classes
- Paper Series

Students:

Browse → View → Enroll → Pay → Confirm

13. Unit Classes

Teachers can create a class covering a complete unit.

Example:

Grade 10 Mathematics
Unit: Algebra
English Medium
4 Classes
LKR 2,000

Students can enroll in the unit class.

14. Topic Classes

Teachers can create classes for a specific topic.

Example:

Grade 10 Mathematics
Topic: Quadratic Equations
English Medium
1 Hour
LKR 800

These classes should connect with the student's **Not Clear Topics**.

15. Full Subject Classes

Teachers can create a complete subject programme.

Example:

Grade 10 Mathematics
Full Subject Programme
English Medium
Weekly Classes

Students can enroll in the programme.

16. Class Series

Teachers can group multiple related classes into a series.

Example:

Grade 10 Mathematics – Algebra Master Series

Class 01 - Introduction
Class 02 - Basic Problems
Class 03 - Advanced Problems
Class 04 - Past Papers

Teacher can:

- Create series
 - Add classes
 - Set full-series fee
 - Set individual class fee if required
 - Set schedule
 - Set maximum students
-

17. My Requests

Students need a separate request management page.

Each request should display:

- Subject
- Grade

- Medium
- Topic/Unit
- Teacher
- Requested date
- Preferred time
- Fee
- Status

18. Group Class Request / Demand

Students can request a group class for:

- Topic
- Unit
- Past Paper

Example:

Grade 10 Science
Minerals and Rocks
English Medium

The system records this as **Demand**.

Teachers can see:

Grade 10 Science
Minerals and Rocks
English Medium
8 Students Interested

Teacher can select:

Create Class

and create a class based on the demand.

19. Demand System

Demand categories:

- 1-to-1 Requests
- Topic Demand
- Unit Demand
- Paper Demand
- Group Class Demand

Core flow:

```
Student Need
  ↓
Demand Recorded
  ↓
Teacher Sees Demand
  ↓
Teacher Creates Class
  ↓
Matching Students Notified
  ↓
Students Enroll
```

20. My Syllabus & Progress

Syllabus should be based on:

```
Grade
  ↓
Stream
  ↓
Subject
  ↓
Unit
  ↓
Sub-unit
  ↓
Topic
```

Each topic has:

☐ **Not Started**

☐ **Not Clear**

☒ **Clear**

Students can manually update the status.

21. Not Clear → Class Recommendation

This is a key LearnyMo feature.

Example:

Student:

Grade 10 Mathematics
Algebra → Quadratic Equations
Status: **Not Clear**

Teacher creates:

Grade 10 Mathematics
Algebra → Quadratic Equations
English Medium

The system identifies the matching topic.

Student receives:

 **A class is available for one of your Not Clear topics.**

Student can:

View Class → Enroll/Book

22. Study Planner

LearnyMo MVP should include the platform's **1–4–7 study rule**.

Day 1

Learn

Day 4

Review

Day 7

Recall / Test

Example:

17 Sep
Physics - Topic X
Day 1 - Learn

20 Sep
Physics - Topic X
Day 4 - Review

24 Sep
Physics - Topic X
Day 7 - Recall/Test

Students can define preferred study slots.

23. Timetable

Timetable is separate from Study Planner.

Only **confirmed classes** appear here.

Views:

- Daily
- Weekly
- Monthly

Each class displays:

- Date
 - Day
 - Time
 - Subject
 - Topic
 - Teacher
 - Class Type
 - Duration
 - Status
-

24. Student Chat

Chat is included in the MVP.

Student and teacher can communicate through the LearnMo website.

Chat activation rule

Chat should become available when a booking reaches:

Teacher Accepted / Student Accepted

or, preferably, once the booking is **Confirmed**.

For the MVP, the recommended rule is:

Booking Confirmed → Chat Enabled

This prevents unnecessary communication before a real booking exists.

25. Class Link Inside Chat

The class link should **not be treated as a normal text link only**.

The chat should contain a dedicated **Class Card**.

Example:

The **Join Class** button should take the authorized student/teacher directly to the LearnMo online classroom.

26. Online Classroom

For MVP, the class should have a dedicated online classroom.

The exact video technology/provider can be selected during development.

Basic classroom functionality:

- Student joins
- Teacher joins
- Video/audio
- Microphone
- Camera
- Leave class
- Basic class information

Access should only be given to users associated with that confirmed booking.

Class access states

Pending Booking
→ No Join Button

Confirmed
→ Join Class Available

Completed
→ Class Ended

27. Chat Features

MVP chat:

- Text messages
- Timestamp
- Read/unread status
- Class card
- Join Class button
- Basic notification

Optional if technically feasible within MVP:

- Image sharing
- PDF/file sharing

28. Student Wallet

Wallet should display:

Balance

- Current Balance
- Available Balance

Transactions

- Class payment
 - Membership payment
 - Wallet top-up
 - Refund
 - Other transactions
-

29. Student Profile

Student can update:

Personal Information

- Profile photo
- Full name
- WhatsApp
- Mobile
- Email
- Location

Academic Information

- Grade
- Stream
- Subjects
- Medium

Students should be able to change their academic information later.

30. Past Papers & Notes

Students can browse:

- Grade
- Subject
- Medium
- Year
- Paper type
- Unit
- Topic

Students can:

- View
- Download
- Search

Admin manages uploaded content.

31. Student Notifications

Notifications for:

- Teacher found
 - Teacher accepted
 - Booking confirmed
 - Payment confirmed
 - Chat message
 - Class reminder
 - Class starting
 - New matching class
 - Group class
 - Demand update
 - Cancellation
 - Feedback request
-

32. Teacher Registration

Teacher fields:

Personal

- Full Name
- Profile Photo
- WhatsApp
- Mobile
- Email
- NIC
- Location

Teaching

- Grades
- Streams
- Subjects
- Medium

Qualifications

- O/L Results
- A/L Results
- Degree
- Diploma
- Other Certificates

Teacher must specify:

I teach:

- Specific Topics
- Units
- Full Subjects

33. Teacher Verification

Statuses:

Pending
Verified
Rejected

Admin reviews uploaded documents.

Only verified teachers should normally be available for student matching/listing.

34. Teacher Dashboard

Main navigation:

Dashboard

Classes

- My Classes
- Create Class
- 1-to-1
- Group
- Paper
- Unit
- Topic
- Full Subject
- Class Series

Demand

Schedule

Wallet

My Profile

Chat

Notifications

Settings

Help & Support

35. Teacher Dashboard Summary

Show:

- Today's Classes
- New Student Requests
- New Demand
- Upcoming Classes
- This Month's Earnings

Example:

 Student Demand

Grade 10 Mathematics

Algebra

12 Students Interested

[Create Class]

36. Teacher – Create Class

Teacher can create:

- 1-to-1 Class
- Group Class
- Paper Class
- Unit Class
- Topic Class
- Full Subject Class
- Class Series

Class fields:

- Class Poster
 - Class Title
 - Class Type
 - Grade
 - Stream
 - Subject
 - Unit
 - Sub-unit
 - Topic
 - Medium
 - Description
 - Date
 - Time
 - Duration
 - Fee
 - Maximum Students
 - Registration Deadline
 - Recurring / One-time
 - Series information
-

37. Teacher Class Poster

Teacher should be able to:

Option 1

Upload their own poster.

Option 2

Create a poster using a LearnMo template, if included in the MVP implementation.

The poster should be displayed on the student class listing.

38. Teacher Class Status

Draft
Published
Full
Ongoing
Completed
Cancelled

Teacher can manage classes from one location.

39. Teacher Demand

Teacher can view:

- Student 1-to-1 requests
- Topic demand
- Unit demand
- Paper demand
- Group demand

Filters:

- Grade
- Subject
- Medium

- Unit
- Topic
- Class type
- Preferred time

Example:

 Grade 10 Mathematics
Algebra
English Medium
12 Students Interested
Preferred: Evening

[Create Class]

40. Teacher Schedule

Teacher should be able to manage:

Calendar

- Daily
- Weekly
- Monthly

Availability

Example:

Monday

- 5 PM – 7 PM
- 8 PM – 10 PM

Wednesday

- 6 PM – 9 PM

Saturday

- 9 AM – 12 PM

Also:

- Unavailable dates
- Holidays
- Recurring availability
- Maximum classes per day

Availability should be used for teacher matching.

41. Teacher Profile

Teacher profile contains:

Personal Information

- Profile photo
- Name
- Bio
- Location
- WhatsApp
- Mobile
- Email

Teaching Information

- Grades
 - Streams
 - Subjects
 - Units
 - Topics
 - Medium
 - Class Types
 - Availability
 - Fees
-

42. Teacher Academic Configuration

Teacher should be able to add/remove/update:

Grades

Grade 6 → Grade 13

Streams

Relevant A/L streams.

Subjects

Subjects they teach.

Units

Units they teach.

Topics

Topics they teach.

Academic hierarchy:

Grade
↓
Stream
↓
Subject
↓
Unit
↓
Sub-unit
↓
Topic

This data must be used for:

- Teacher matching
- Student requests
- Demand
- Not Clear topic recommendations
- Class creation

43. Teacher Fee Settings

Teacher can configure:

1-to-1

- Per Hour

- Per Class
- Monthly

Group

- Per Student
- Per Class
- Full Series

Fees can be updated later.

44. Teacher Wallet

Display:

- Total Earnings
- Pending Earnings
- Available Balance
- Withdrawable Balance

Transaction history:

- Class payment
- Platform commission
- Refund
- Withdrawal
- Adjustment

Revenue split:

80% Teacher

20% LearnyMo

The system should automatically calculate the platform split.

45. Teacher Rating

After a completed class:

Student can give:

1–5 stars

Optional written feedback.

Example:

★ 4.8 / 5
25 Ratings

46. Teacher Repeat Rate

Repeat Rate should remain separate from rating.

Formula:

Students who booked the same teacher again ÷ Total unique students who completed a class with that teacher × 100

Example:

50 unique completed students
35 returned

Repeat Rate = 70%

Cancelled classes should not count as completed classes.

47. Teacher Chat

Teacher can access:

Chat

and communicate with students who have a valid booking.

The chat should be connected to the relevant booking/class.

Example:

Teacher
↓
My Classes
↓
Grade 10 Mathematics
↓
Student
↓
Chat

The class card and **Join Class** button should be available in the conversation.

48. Teacher Notifications

- New student request
 - New demand
 - Student accepted
 - Student enrolled
 - New chat message
 - Class reminder
 - Class starting
 - Payment received
 - Cancellation
 - New rating
 - Withdrawal update
-

49. Teacher Settings

Account

- Change password
- Change email
- Change mobile
- Logout
- Deactivate account

Availability

- Teaching hours
- Available days
- Holidays

Notifications

- Email
- Platform notifications
- WhatsApp/SMS, if supported

Payment

- Bank details
- Withdrawal settings

Privacy

- Profile visibility
 - Contact visibility
-

50. Teacher Help & Support

- Help Center
 - FAQ
 - Contact LearnyMo
 - Report a Problem
 - Teacher Guidelines
 - Terms & Conditions
-

51. Admin Dashboard

Admin navigation:

Dashboard
Students
Teachers
Teacher Verification
Classes
Demand
Academic Management
Payments
Past Papers & Notes
Reports
Notifications
Settings

52. Admin – Student Management

Admin can:

- View students
 - Search students
 - View profiles
 - Activate/deactivate
 - View bookings
 - View requests
 - View payment history
-

53. Admin – Teacher Management

Admin can:

- View teachers
 - Search teachers
 - View profiles
 - Verify teachers
 - Approve/reject
 - Activate/deactivate
 - View classes
 - View ratings
 - View earnings
-

54. Admin – Academic Management

Admin manages:

Grade
↓
Stream
↓
Subject
↓
Unit
↓
Sub-unit
↓
Topic

Admin can:

- Add
- Edit
- Delete
- Activate/deactivate

This should be dynamic rather than hard-coded.

55. Admin – Class Management

Admin can manage:

- 1-to-1
- Group
- Paper
- Unit
- Topic
- Full Subject
- Series

Admin can:

- View
 - Edit
 - Suspend
 - Cancel
 - Monitor enrollment
 - Monitor class status
-

56. Admin – Demand Management

Admin can view:

- Total demand
- Unfulfilled requests
- High-demand topics
- High-demand units
- High-demand subjects
- High-demand papers

- Group class demand

Example:

Grade 10 Mathematics
Algebra
English Medium
24 students interested

57. Admin – Payment Management

Admin can view:

- Total transactions
- Student payments
- Teacher earnings
- LearnMo commission
- Refunds
- Withdrawals
- Pending payments

Automatic split:

80% Teacher

20% LearnMo

58. Admin – Content Management

Admin manages:

- Past Papers
- Notes
- Learning resources

Metadata:

- Grade
- Stream
- Subject

- Medium
 - Year
 - Unit
 - Topic
 - File
-

59. Membership

LearnyMo membership:

First 3 Months

FREE

After 3 Months

Monthly – LKR 99

Yearly – LKR 999

Important:

Membership fee is separate from teacher/class fees.

60. Payment System

MVP should support:

Student

- Class payments
- Group class payments
- Membership payments
- Wallet

Teacher

- Earnings
- Withdrawals

Class payment automatically calculates:

Teacher 80% + LearnMo 20%

A suitable Sri Lankan payment gateway should be integrated.

61. Anti-Bypass / Platform Protection

LearnMo should minimize direct teacher/student bypassing.

Recommended:

- Avoid unnecessarily displaying personal phone numbers
- Use LearnMo Student IDs
- Use LearnMo Teacher Profiles
- Keep bookings on the platform
- Keep payments on the platform
- Platform chat
- Teacher terms
- Student terms
- Non-circumvention/platform-use clause

The goal is to make LearnMo valuable for:

Discovery + Booking + Chat + Payment + Scheduling + Classroom + Reputation + Repeat Classes

Final legal terms should be reviewed by a Sri Lankan lawyer.

62. Security Requirements

MVP must include:

- Secure authentication
- Password hashing
- Role-based access
- Authorization checks
- Secure document storage
- Payment security
- File upload validation

- Input validation
- Basic audit logs
- Protected online classroom access

A student must not be able to access another student's booking/chat/classroom.

A teacher must only access students/classes associated with their bookings.

63. Responsive Design

Website must work on:

- Desktop
- Laptop
- Tablet
- Mobile

Priority mobile screens:

- Class Booking
 - Class Details
 - Chat
 - Join Class
 - Teacher Class Creation
 - Demand
 - Timetable
 - Wallet
-

64. UI / UX

LearnyMo should be:

- Modern
- Clean
- Professional
- Educational
- Gen-Z friendly
- Easy to use
- Not childish

Use the official LearnnyMo branding:

Blue + Teal/Green + Purple + White + Yellow accents

The official LearnnyMo logo must be used without modifying the logo design.

65. Core Database Structure

The system should be designed around:

Academic:

Learning:

Completion

Rating

66. Complete Student Journey

- Grades
- Subjects
- Units
- Topics
- Fees
- Availability
- Create Classes
- Poster
- Demand
- Schedule
- Wallet
- Chat
- Online Classroom

Admin

- User Management
- Teacher Verification
- Academic Management
- Class Management
- Demand Management
- Payment Management

71. P1 – Important

- My Syllabus
- Not Started / Not Clear / Clear
- Not Clear → Class Recommendation
- Study Planner
- 1–4–7 Study Rule
- Past Papers & Notes
- Teacher Rating
- Repeat Rate
- Notifications
- Class Series

- Paper Classes
 - Unit Classes
 - Topic Classes
 - Full Subject Classes
-

72. Phase 2 / Future

These should not delay the first MVP launch:

- Advanced in-platform chat
 - Advanced video classroom
 - Online whiteboard
 - Attendance
 - Recorded classes
 - AI Quiz
 - AI Tutor
 - AI recommendations
 - Advanced analytics
 - Native Android app
 - Native iOS app
-

73. Final Core Product Principle

LearnyMo should **not** be developed as only a teacher directory.

The MVP should be built around these three connected systems:

Student System

Need → Booking → Payment → Chat → Class → Progress

Teacher System

Profile → Demand → Class Creation → Booking → Teaching → Earnings

LearnyMo System

Academic Data → Matching → Demand → Classes → Payments → Reputation

The most important end-to-end flow to complete first is:

Student requests a class → Teacher is matched → Teacher accepts → Student accepts → Payment → Booking confirmed → Chat opens → Class card appears → Student/Teacher click Join Class → Online class → Completion → Rating.

That should be the **primary functional backbone of the LearnMo MVP.**
